Wednesday, April 26, 1973

Last chance on Friday for English test

That Freshman Composition class you were thinking of finally taking may be a waste of time, if you are already well versed in the complexities of English grammar.

The State University and College system, in cooperation with the College-Level Examination Program (CLEP), is providing for the first time, an English Equivalency Test to earn college credit for English skills previously acquired. The application deadline for the test is Friday.

The English Equivalency Test is to be given once only on May 12 at 10 a.m. at colleges across the state. It will be held here in Administration 211. College credit received in the test, nine quarter units of English or six semester units, will be transferable until the end of 1974 at any California State University and College campus. Some University of California campuses may also grant credit.

The test will run about four hours with a one hour break. It is divided into two ninety-minute segments. The first will deal with 100 multiple-choice questions on literary passages supplied in the test. No previous knowledge of these works is necessary. The second part of the test consists of two essays on various topics, composed by English professors throughout the State University and College system.

Scores will be recorded as either "pass" or "fail" with no grade points awarded. To pass, the average performance of "C" students who have taken Freshman English must be met. The appropriate semester or quarter units will be entered on records automatically. If the test is failed, it will be invalidated and not held against you.

Applications can be picked up at the Counseling Center and the Admissions Office in the Administration Building. A \$15 registration fee is required to be mailed with the application or given to Mrs. Clara Frogatt, Adm. 211.

Water samples will be tested at Poly Royal

The Chemistry Department will offer free hard water analysis during Poly Royal.

Water samples will be analyzed to determine in parts per million, the amount of calcium and magnesium contained in the sample. The testing will be conducted by students in the D-wing of the Science Building. Samples brought to the lab should be at least one pint in size.

Soft water samples will also be analyzed. These samples should be taken from a hot water tap.

photo by Scott Harrison

Construction of an air-supported structure began yesterday in front of the Library by members of an Architecture 470 class. The structure is a master thesis by Jim Montero using a special computer program. The National Endowment for the arts gave Montero a \$1,000 grant for the project. According to Montero the money is "almost gone" on a project he was told couldn't be done.

PLAYROOM 'WONDERLAND'

Chem display for kids

When Alice fell in the rabbit's hole, was she really holding a test tube?

According to Dr. Robert Cichowski, chemistry professor, she will be, at Poly Royal during the first chemistry playroom geared for youngsters from four to eight years old.

Named "Alice in the Chemical Wonderland," displays and demonstrations will feature chemical relationships for youngsters and their parents. While Mom and Dad view the displays, the youngsters can make water molecules from marshmallows and gumdrops, play with disappearing ink, make a crystal garden, and change the colors of certain solutions.

The playroom will be located on the West lawn of the Science Building and will be open on Saturday from 8 a.m. to 5 p.m. Lifesize characters have been constructed to add to the realism of the setting.

Archies premier display

The department of Landscape Architecture will host visitors during its first Poly Royal display.

A continuous slide show, refreshments, and guided tours through the redecorated workshop will be from 11 a.m. to 5 p.m. on Friday and 8 a.m. to 5 p.m. on Saturday.

The displays will encompass the schools' first year of

existence. Solutions to hypothetical problems and their application towards the development of a workable environment will be the key themes of the displays.

Mercury was used in manufacturing felt hats, thus chronically exposing workers to mercury poisoning. The tremor which developed became known as the "hatter's" shakes and the

Math contest will draw state-wide contestants

The 21st annual Poly Royal Mathematics Contest will be held here Friday at 9:30 a.m.

Volmar A. Folsom, a member of the Mathematics Department said, "There will be some 800 students from high schools throughout California, who will be entering the contest."

Solutions to hypothetical problems and their application towards the development of a workable environment will be the key themes of the displays.

The new Landscape Architecture lab is located in the old post office building on the corner of College Ave. and south Perimeter Road, across from the stadium.

SEC stumbles on aggie board

by ROBERT TERRILL

Controversy concerning the establishment of a Western Programming Board erupted at the Student Executive Cabinet meeting Monday night.

Clay Bowling, ASI Program Board chairman, moved for SEC to reject the concept of a Western Programming Board and notify the Student Affairs Council of the rejection. The motion failed.

"Adding a new board to compete with the existing Program Board does not make sense. We already have the mechanism for arranging concerts and speakers. We have established relations with agents, and if another board is formed which will deal with these agents, those relations will be damaged."

"We have no objection to forming a committee for rodeos and agricultural judging teams; there would be no redundancy in conducting these activities. I think that these areas can successfully organize under the

committee concept," said Bowling.

ASI Vice President Denny Johnson supported the new board.

"The Western Programming Board could tap new sources of income and perhaps in four or five years greatly reduce the ASI subsidy in the four agriculture areas presently budgeted.

"The committee concept would not be as effective as a board, and the Aggies don't want to be lumped under some other board, as they would in that concept," said Johnson.

Lee Pitts is heading a committee which will submit the Western Programming Board codes to the Codes and Bylaws Committee within a week, according to Johnson.

In other business SEC cut the next year budget for the Educational Opportunity Program and Ethnic Program Board by \$6,000 and \$1,000, respectively.

In defending the two programs, Fred Johnson, Ethnic Program Board chairman, said that caucasians on campus were misinformed about the ethnic people and EOP.

"We are here to get an education, meet people, and get to know others."

KCPR adds listen power to Poly Royal

Campus radio station KCPR has extended its broadcast day to 24 hours during this week for complete coverage of Poly Royal activities.

KCPR coverage on Thursday and Friday will feature a remote broadcasting station located next to the Union Information Desk. At various times during the day, listeners may also tune in to remote coverage of selected exhibits and activities around campus, including the Poly Royal Rodeo.

The staff of KCPR will also be hosting tours and displays throughout the main control room and offices of KCPR, located in Graphic Arts 202.

Daily goofs

To correct an article in Mustang Daily's Poly Royal Edition, the Carnival Dance will be sponsored by the Music Clubs, not Poly Phase, and will be held from 8 p.m. to 12 p.m. Friday in the Men's Gym.

'Fantasticks not so hot'

by KEVIN O'CONNOR

(The Fantasticks will be presented in the campus theater at 8 p.m. Wednesday through Saturday, April 25-28.)

The Fantasticks, we have been told, is one of off-Broadway's longest running musicals. After reviewing it at the next to last

rehearsal, I wondered what it was running from.

The plot is a combination of classic poses. A boy and a girl fall in love over a high brick wall which their fathers have built between their adjoining gardens during a feud. It develops that the feud is a fake designed to cause the children to fall in love.

Reverse psychology lovers, this is your kind of play.

The fathers decide to hire a villain (who also is the narrator) to stage a rape in which the boy is the hero rescuing the girl and giving the fathers an excuse to patch things up. The morning after the rescue, the fathers get the bill from the villain and 'fess up. The boy and girl get upset and fall out of love. Entirely predictable? It gets worse.

The boy goes off to see what the real world is like. The villain moves in and steals the girl's heart (as well as her necklace). They plan to run away together to see the world. The boy comes back singing of the despair in the world (during the love scene, no less) and the villain takes off. The lovers are re-united and live happily after.

The acting is not bad. All the fight scenes are dandies. Negative emotions appear very familiar to the actors, who seem to show just how they would respond in the situation.

Not so for the love scenes. Here the cast has substituted how they think love ought to be played for

(Continued on Page 3)

'Changing realities'

John Forster

There has been hell-raising the last few weeks because the old Ag. Ed. building is scheduled to be destroyed this June to clear the site for the new architecture building. Many interesting proposals have been put forward that deserve our discussion.

The qualities of old Ag. Ed. are many. The building is well used and liked by its current archie inhabitants and food patrons. With an increasing respect for beautiful historical buildings that remind us of the character and values of yesteryears, many people see Ag. Ed. as a refreshing perspective on our heritage.

However, a new building would accomodate many more architectural students who could, if quality education is maintained, learn to construct buildings much less damaging to the environment than those (perhaps including the new architectural building) now being built. Permanently sealed windows, eternally running air conditioners and heaters — often at the same time, too high level of illumination, etc. etc., are characteristics unneeded in tomorrow's buildings.

I feel that the architecture department should be in the forefront of good environmental design and decision by setting a good example for its students. The new building should best exemplify the standards asked of others. Remember, P. G. & E. tells us that power shortages will shortly be upon us with attendant brownouts, blackouts, etc. So why are we designing new buildings that are excessively power-hungry?

Students from every department must encourage an integration of the new building to co-exist with the old. Also, in a university where you have a school of construction engineering, a school of architecture, a school of agriculture—outfitted with many types of heavy equipment, and large supplies of cheap labor, certainly the technology exists to bring up old Ag. Ed. to the Field Act earthquake requirements.

A thorough consideration of alternative proposals is needed now. A cost-benefit analysis is being made to estimate the cost of bringing the building to earthquake standards using the full resources of the school in this educational endeavor.

The crux of the problem deals with who should make the decisions that affect the interest and welfare of the students and community. Should we rely on "wisdom" that was incorporated into a "master" plan eight, 10, 15 years ago? I don't think so. Or should we incorporate changing realities?

Group provides info booth for Royal activities

The Society for the Advancement of Management will have an information booth on the lawn in front of the clock tower during Poly Royal.

The club would appreciate it if every organization that is sponsoring any kind of activity or display for that weekend, make a list of the important information concerning the activity and leave it in the director of activities box in room 130 of the Business Administration Building or contact Joan Cartrey at 544-3726.

how love is, a saccharin substitute which tastes as bad as diet cola to those of us used to The Real Thing.

The young lady who plays the wall and the gentleman who does the dying scenes give the best performances.

The director has done the best he could, attempting to cope with a cliché-laden script and a scarcity of vocal talent. Playgoers will probably enjoy the evening should they decide to go. Just don't expect off-Broadway or even Allan Hancock.

Cows get dressed up

A Dairy Heifer Dressing Contest is one of the activities planned by the Los Lecheros Dairy Club for Poly Royal. The contest will be held Saturday in the Dairy Judging Pavilion at 11 a.m.

According to Dr. Harry Markos, Los Lecheros advisor, the contest is open to any student, and clubs are encouraged to

enter as a team. The number of heifers available for the contest is limited, so those interested are urged to enter as soon as possible. Entries are available in Agriculture 144 or the Activities Planning Center.

For further information contact Dennis Edlund, Dairy Heifer Dressing Contest Chairman, 544-7162.

OPEN HOUSE AT STENNER GLEN
Poly Royal Weekend

Refreshments served noon-2 on Saturday
tours available all weekend

Stenner Glen
1050 Foothill Blvd. 544-4540

Diamond team to host Chico

Ranked 13th in the Associated Press college division polls, the Mustang baseball team will try to improve its overall record of 23-10 today as it host California State University, Chico, for a noon doubleheader at Poly Field. Righthanders Doug Alderman and Dave Brunell are slated to start on the mound.

With first place on the line for the California Collegiate Athletic Association crown, the Mustangs will host Cal Poly Pomona in a do-or-die series this weekend. The Mustangs must win at least two out of three games from the Broncos or they will finish in second place for the third year in a row.

If the Mustangs win two games this weekend, they must take two games from California State University, Northridge, and hope California State University Fullerton, can win one game from the Broncos the following weekend.

All three games this weekend have been changed to San Luis Obispo Stadium due to Poly Royal. Friday's opener will start at 6:00 p.m. and the doubleheader on Saturday will begin at noon.

Track runs at Mt. SAC next

Competing against a host of top-flight competitors, the Mustang track team will be celebrating Poly Royal by taking part in the Mt. SAC Invitational Relays Friday and Saturday.

Overall college division competition takes place on Friday with the highlight of the Relays coming on Saturday when

individual competition gets underway.

Running on Friday will be the mile relay quartet of Kerry Gold, Art Markham, Dave Johnson, and Walter Meade; the 440 relay quartet of Jim Davis, John Haley, Russ Grimes, and Meade; and the 880 relay squad of Gold, Haley, Davis, and Meade.

TO: Interested Applicants

FROM: William F. Schilz
Assistant General Manager

DATE: April 19, 1973

SUBJECT: Job Opening for Resident Assistants

THIS MEMO SENT TO YOU FOR ACTION ☐ INFORMATION ☐

Overview:

A Resident Assistants primary responsibility will be to his assigned building. He assists residents in meeting their physical, social, interpersonal and educational needs relative to their living situation. The Resident Assistant will be responsible for keeping his building in good operating condition by making the housekeeping and maintenance staffs aware of areas that need attention. He will be responsible for carrying out administrative tasks relative to the residents of his building (i.e., inventories, rosters etc.) as is assigned and required by the Director's office. He will put in his assigned on-duty hours during weekdays, evenings, and weekends. He will participate in a continuous on-going training program throughout the year. Part of the initial and on-going training program for Resident Assistants will be direct cross-training in all areas of residence hall management. The design will be that all Resident Assistants fully understand all staff functions. In conclusion, the Resident Assistant will have significant responsibility to participate in operating a physical environment which is highly conducive to comfortable living and which creates a climate which encourages involving and responsible contact among the residents.

Minimum Personal Qualifications:

1. Completion of at least 30 units of accredited college work with an overall G.P.A. of 2.5.
2. Presently enrolled at Cal Poly.
3. One year of living experience in a student residence hall.
4. Must not need to hold an outside job.
5. Willingness to give of yourself to both residents and staff.
6. Willingness to reside in the unit.

Compensation:

1. Full room and board for the academic year.
2. Telephone connection charge plus monthly service charge.

For Further Information Contact:
